STATUS OF TTIC ACTIONS: SEPTEMBER 1986I. Highlights

- ° As a result of initial discussions in Moscow about the resumption of the US-USSR space bilateral agreement, the Soviets tabled five research topics in addition to those presented by the US side. The NSC plans to ask TTIC's Subcommittee on Exchanges (COMEX) to review the technology transfer implications of the proposed five research topics prior to a 27 October meeting in Washington with the Soviets. [REDACTED]
- ° At the request of the Department of State, TTIC was asked to prepare a study on the national security implications of the possible sale of deep sea submersibles to the USSR by Finland. The study will support policy level discussions with Finnish government officials. [REDACTED]
- ° The draft study sponsored by the National Academy of Sciences on the impact of national security export controls on US business will be reviewed by the NAS study panel on 28 October. The draft probably will be available in November for review by TTIC (for sanitization primarily), Defense, Commerce and State. [REDACTED]
